

Name: Katie Matthews

Occupation: event planner 🎉, organizing parties, concerts, and festivals.

Story: Katie grew up in a small town where money was tight, so she had to work part-time jobs from a young age to help her family. She struggled in college at first because she was the first in her family to go, but she pushed through late nights of studying and supporting herself financially. Despite the challenges, she developed a strong love for travel and storytelling, which led her to become a travel blogger. Her past struggles gave her resilience, and now she uses her platform to inspire others to explore the world, even if they come from humble beginnings like she did.

“Hi, I’m Katie Matthews. I’m 29 and work as an event planner, but to me, it’s more than just a job—it’s about creating moments that people will remember forever. Life hasn’t always been easy, and there were times I doubted if I’d make it, but every struggle taught me something about patience, strength, and joy. Being an event planner means constantly balancing time, making tough decisions, and staying calm when things don’t go as planned. I’ve learned to grow through those moments—to trust my instincts, stay organized, and find peace in the chaos. I love what I do because it lets me bring people together, fill a room with laughter, and remind everyone (including myself) how beautiful life can be when we celebrate it.”

Challenges: time management & decision making

Purpose statement:

My website is designed to help people mostly katie matthews stay organized and make confident, creative decisions in their work as event planners. This space allows me to manage projects efficiently, explore and compare design ideas, and keep track of everything I need to bring each event to life. It serves as both a professional planning tool and a personal creative outlet, helping me balance structure with inspiration. Through this site, I aim to improve my time management, strengthen my decision-making, and continue growing as a planner who turns ideas into meaningful, unforgettable experiences.”

Website purpose statement:

“The purpose of my website is to help me stay organized, manage my time more effectively, and make confident decisions in my work as an event planner. By keeping track of projects, deadlines, and ideas in one place, this site allows me to stay balanced and focused, even when things get hectic. It’s a space where I can reflect on my progress, plan ahead, and continue growing in both my creativity and my confidence. My goal is to use this platform not only to improve how I work, but also to find more joy and calm in every event I create.”

Description of prototype -

- What is your website mainly for?

For people to interact with others from different places and learn languages they would like without having ads or anything else bother them while learning

- What languages will kids be able to learn?

The people that will use the app can learn any language that they want to learn

- How will learning be fun — with games, stories, or videos?

For kids there will be games, stories and videos to help them learn same will go for the older kids and adults if they desire to watch the stories or play the games on the website

- Can kids play and learn with others from around the world?

Yes kids will be able to connect play and speak with others from different countries

- How will the website help kids talk and practice together safely?
- What ages is the website made for?
- Will kids learn by themselves, or will teachers help too?
- How will parents see what their kids are learning?
- What makes your website special or different from others?
- Will kids get rewards or badges for learning?
- What will the website look like — colorful, animated, or simple?
- Will kids also learn about different cultures and traditions?

Feedback:

Name: Alex Rivera

Age: 26

Location: Barcelona, Spain

Personality: Curious, friendly, and a bit geeky in the best way. Alex loves diving into new languages and cultures — currently learning Korean and French. They get super excited about tech gadgets, AI tools, and how technology can make learning more fun. Music is their life — they play guitar, produce electronic beats, and always have a playlist for every mood.

Vibe: Supportive but thoughtful — Alex gives honest feedback while keeping it positive. They love creative ideas, especially anything that mixes language, tech, or art.

Favorite quote: “Every word you learn is another window to the world.”

Alex says:

“Hey! Your website idea sounds awesome — learning languages through games and connecting with people? That’s totally my thing! I’m super curious about how it’ll all work. Mind if I ask you a few questions to get a better feel for it?”

Alex’s questions:

1. What kinds of games will people play to learn languages? Are they more like quizzes or fun adventure-style games?
2. Will users be able to talk to others around the world — like voice chats or text chats?

3. How do you plan to keep people motivated to keep learning? (Like rewards, badges, or streaks maybe?)

How I want to keep people motivated to keep learning is giving them badges from low rank to higher ranks after for finishing 2-3 lessons, also letting them have streaks with the person they are talking to in the other country

4. Are there levels or goals so learners can track their progress?
5. They are levels that the kids and people get to do
6. Will the website focus on just a few languages at first or offer many from the start?
7. How will technology make it different from other learning sites?
8. Will there be music or sound effects that help with pronunciation or memory?
9. What age group are you designing it for — just kids, or everyone?
10. Can users customize their learning — like choosing topics they care about (music, travel, games)?
11. And... what's the overall vibe you want people to feel when they visit your site — fun and playful, or calm and focused?

Language Learning App – Design Document

Project Summary

The Language Learning App is an interactive platform designed to help users of all ages learn new languages through games, real-world conversations, and global interaction. This product matters because it makes language learning fun, accessible, and culturally engaging for learners everywhere.

Problem Statement

Many learners struggle to stay motivated and engaged while learning a new language, and traditional methods often feel boring or overwhelming.

Use Case

This app will be used by children, teens, and adults who want to learn a new language in an enjoyable way; they will use it to play learning games, practice speaking with others worldwide, and track their progress.

Goals and Objectives

- 1. Provide fun and effective tools that help users learn vocabulary, grammar, and speaking skills.**
 - 2. Create a global community where users can interact safely and practice languages together.**
-

Key Features and Functions

- 1. Interactive Learning Games – Vocabulary, grammar, and pronunciation mini-games.**
 - 2. Global Chat & Voice Practice – Safe, moderated text and voice chat with learners worldwide.**
 - 3. Progress Tracking – Badges, streaks, and skill-level charts.**
-

Tech Stack and Tools

- Frontend: React Native, Flutter, or Swift/Kotlin for mobile apps**

- **Backend:** Node.js or Python (Django/FastAPI)
 - **Database:** Firebase, PostgreSQL, or MongoDB
 - **Real-Time Communication:** WebSockets, Firebase Realtime DB
 - **Speech Recognition:** Google Speech-to-Text or Azure Cognitive Services
 - **Hosting/Deployment:** AWS, Firebase Hosting, or Heroku
 - **Design Tools:** Figma, Adobe XD
-

Algorithm (High-Level)

1. User logs in or creates an account.
 2. App identifies user's language level through a quick assessment.
 3. System recommends games and lessons based on level.
 4. User plays games or joins global practice rooms.
 5. Points and progress are updated and stored in the database.
 6. App sends personalized recommendations for next lessons.
-

Flowchart

Start → User Login/Signup → Level Assessment → Show Dashboard → (Choose: Games / Lessons / Global Chat) → Complete Activity → Update Progress → Recommendations → End

Timeline

Month 1: Requirements gathering, wireframes, and UI design.

Month 2: Backend development (user system, database setup).

Month 3: Frontend development (basic screens and navigation).

Month 4: Implement games and learning modules.

Month 5: Add global chat and voice practice features.

Month 6: Testing, bug fixing, and deployment.

Risk Mitigation

Risk: Users may encounter inappropriate or unsafe language in the global chat.

Mitigation: Use AI moderation, filtered keywords, and optional parental controls.

Evaluation Criteria

- 1. User retention rate after 30 days.**
 - 2. Number of successfully completed lessons per user.**
 - 3. User feedback scores and app store ratings.**
-

Future Considerations

Maintenance Need: Regular updates to language content and security features.

Future Feature: Augmented Reality (AR) learning adventures for immersive practice.

Additional Information from Uploaded File

Prototype Description

- The website/app is mainly for people to interact with others from different countries and learn languages without ads or distractions.
- Users can learn any language they want.
- Learning will be fun through games, stories, and videos for kids, teens, and adults.
- Kids can safely play, talk, and connect with others around the world.

Safety & Interaction

- The platform will include safety features for kids interacting online (parental controls, moderation, restricted chats based on age).

Target Age Group

- Designed for kids ages 8+, teens, and adults.

Learning Format

- Users can learn independently, and optional teacher guidance or tutoring may be added.
- Parents will be able to track progress and see what their kids are learning.

What Makes This Website Special

- No ads.
- Global interaction.
- Fun and customizable learning.
- Cultural learning added to language lessons.

Rewards & Motivation

- Users receive badges from low to high ranks after completing 2–3 lessons.
- They can also earn streaks, including streaks with conversation partners.

Customization

- Users can choose topics they care about (music, travel, games).

Aesthetic/Vibe

- The website will be colorful, playful, and welcoming, but still clean enough for older learners.

Persona Feedback (Alex Rivera)

- Suggested adding adventure-style games.
- Encouraged using voice & text chat globally.
- Recommended progress levels and goals.
- Suggested sound effects and music for memory.
- Asked for clear vibe: fun/playful or calm/focused.
